Eco-Friendly Cleaning & Products

MD Specialist Cleaning services care about the chemicals we use and their effect on the environment. We use Eco-friendly chemicals that create minimal adverse environmental impact and still deliver incredibly high standards of cleaning. Our COSHH trained manager vigorously tests all cleaning products before using them on site.

MD Specialist Cleaning Services uses The ECO-Chemical Range by Jangro. The Enviro range of chemicals is formulated to ensure the impact is kept to an absolute minimum. It is designed to comply with all current European Regulations concerning biodegradability and the preservation of the environment.

There are various schemes used in Europe to determine environmental impact, but none takes account of all the relevant factors. For this reason, a unique system has been devised for assessing the overall environmental impact of a product considering the formulation, manufacture, use and disposal of the product. This scheme is called the 'Wright Environmental Impact Rating' (WEIR)

The ECO-Chemical Range by Jangro.

Builders Clean

From small individual builds to large building contractors, we deliver a consistently excellent builders cleaning service that customers can rely on.

Commercial cleaning

We are The Office Cleaning Experts specialising in larger office spaces, communal areas & environmentally friendly cleaning services.

Disinfectant Fogging

A fogging machine allows us to cover vast areas without missing any surfaces. It also removes the need to wipe surfaces after cleaning.

Gutter Cleaning

At MD Specialist Cleaning our fully trained operatives can efficiently and safely clear your gutters of leaves, moss and general debris.

MD Specialist Cleaning Services Managing Director

Martin Donaldson is the Managing Director of MD Specialist Cleaning Services. Martin is a family man and is a people person. He began his soft services career in 2005 as a team manager for a well-established, family-run cleaning company based in north Cheshire. His duties included fulfilling needs at short notice, ensuring cleaners were trained to high standards, and delivering the best possible cleaning services. Martin gained the trust and loyalty of his long-term customers by going the extra mile to make his clients happy.

After many dedicated years to the company, Martin decided to progress his career and became an Area Manager for Servest Cleaning Services for the Northwest of England. Martin's contracts included chain supermarkets, retail shops, and Post offices.

After only a few years of fulfilling his role and successfully meeting the needs of his customers in the Northwest region, Servest recognised Martin's hard work and dedication, promoting him to Regional Manager for the Northwest of England. Martin has gained over 12 years of intensive knowledge, experience, and customer care. Martin strives to deliver the best cleaning and customer services continually. Servest recognised his passion and dedication by awarding him "Best Regional Manager of 2018."

End of Tenancy Cleaning

End of tenancy cleaning supports tenants and landlords at the end of a tenancy. A thorough deep clean from professional cleaners ensures the accommodation is ready for the next tenant and can help reduce deposit deductions.

Call our team and ask for our End of Tenancy Service. Our dedicated professionals are ready to help anytime, any day.

Our specialist team carry out End of Tenancy Cleaning Services and work to bring the property to the standards expected by the landlords or letting agents.

Our cleaning crews use professional cleaning equipment. When you book your ETC with MD Specialist Cleaning Services every corner of every room of your property will be professional cleaned and cared for.

Our End of Tenancy checklist mirrors the high standards and exclusive cleanliness expected by our clients. Our cleaning services are fully insured, and if you are not satisfied with our cleaning performance, we will re-clean the property.

Our End of Tenancy clean prices may not include a deep carpet clean. Please ask for a quote from our customer care team.

Industrial Cleaning

Industrial or commercial cleaning services across Wales and England is our second speciality. Our cleaning process is specifically tailored to meet our clients' goals and expectations. Our team of cleaners will take care of premises such as factories, distribution centres, office facilities, residential blocks, communal areas, shopping centres, and caravan sites.

Our quality, environmental, and Health and Safety policies cover commercial cleaning. We understand that you have deadlines and production processes that need to be adhered to; our employees are extensively trained to the British Institute of Standards (BICS) and comply with health and safety legislation. Additionally, our COSHH trained staff are reviewed every 12 months.

Our Industrial and Commercial cleaning services include:

- ✔ After builder's cleaning
- ✔ Construction cleaning attendants
- ✔ Garden/outside area cleans
- ✔ Kitchen deep clean
- ✔ Pressure washing
- ✔ Carpet and upholstery cleaning
- ✔ Floor maintenance especially scrubbing, polishing and buffing
- ✔ High level window/glass cleaning
- ✔ One-off commercial cleaning
- ✔ Washroom and cubicles deep cleans

Health and Safety Policy

MD Specialist Cleaning Services aims to ensure our employees' health, safety, and welfare while they are at work and of our clients while we are on their property.

To ensure that the fundamental principles of health and safety are clearly understood throughout MD Specialist Cleaning Services, we are committed to:

Appropriate Systems

Ensuring that appropriate systems are developed and maintained for the effective communication of health and safety matters throughout the company.

Consultation

Ensuring that employees and their representatives are consulted and encouraged to participate in all health and safety management areas.

Effective Planning

Ensuring that arrangements are put in place for the effective planning, development and review of our health and safety policy.

Protection

Protecting the safety and health of all our employees by preventing work related injuries, ill health, disease, and incidents.

Safety Laws

Complying with relevant health and safety laws and regulations, voluntary programmes, and collective agreements on health and safety.

Safety Management

Continually improving the performance of Health and Safety Management.

Health and Safety

Liaising and working with all necessary persons to ensure health and safety, and ensuring that adequate arrangements are in place for the health and safety of visitors.

Resources

Devoting the necessary resources in the form of finance, equipment, personnel, and time to ensure the health and safety of employees.

Office Cleaning - Experts Commercial Cleaning

We work with you to determine a cleaning list, ensuring the best and most thorough service. We meet with you when we agree on the contract so you can show us around your commercial premises and point out anything we need to know.

Our services include: dusting, picking up the cutlery and cups from the desks, washing up, disinfecting telephone handsets, vacuuming, mopping, emptying the bins, cleaning the windows ledges, and cleaning skirting boards. We know how important it is to keep your fridge, microwave and coffee maker clean; our cleaners will see to them daily.

We can arrange other services for regular customers, including buffing floors, shampooing carpets and window cleaning.

We aim to provide you with the highest possible service at the most affordable price. Every office is different, so we are always happy to meet and discuss your needs. Once we have discussed your requirements, we estimate how many hours cleaning are needed.

We treat every client as an individual and get to know you and your business. Communication is key to our ongoing, positive relationships with our clients, and we are always here to listen. We respond quickly to all comments and queries.

Gutter, Window and Paveway Cleaning

MD Specialist Cleaning Services is committed to providing an efficient and reliable service to our customers. Our water fed pole system enables us to offer a safe, quick and superior cleaning service, providing better results than traditional cleaning methods.

Using a pure water system ensures that your windows stay cleaner for longer. It has the additional advantage of lifting dirt from sills and ledges during the cleaning process. We guarantee a first-class window cleaning service for all our domestic and commercial customers.

Your guttering stops rainwater from damaging your property, so it is vital to maintain it well. If you allow your gutters to become clogged, this may lead to water ingress. Our market-leading pole system MD is back by our many years of experience, so you are guaranteed outstanding cleaning results on your gutters and fascias.

Disinfectant Fogging

Covid-19 has highlighted the importance of maintaining a clean work environment. Deep cleaning public places, work environments, schools, holiday homes, care homes, shops, hair salons, public houses, cafes and even private homes can help reduce the spread of viruses and keep bacteria at bay.

A fogging machine allows us to cover vast areas without missing any surfaces. It also removes the need to wipe surfaces after cleaning. The sanitiser lands dry on hard and soft surfaces without causing any harm. It offers a complete covering of disinfectant, killing up to 99.99% of all living viruses and harmful bacteria.

After we have disinfectant the setting, we will provide you with a decontamination certificate that is valid for 30 days.

Specialist Extraction Deep Clean

Our Specialist Cleaning services can provide commercial kitchen extraction cleaning as part of many of the other cleaning services you require.

Extraction cleaning is extremely important in order to prevent fire as well as the risk of bacterial contamination of food.

If the extraction units within your kitchen are not cleaned properly, on a regular basis, grease left in the ductwork builds up over time making it more difficult and time consuming to remove. Failure to ensure regular cleaning of kitchen extract systems can also invalidate your industrial or commercial building insurance cover.

In many cases, the canopy and filters are easy to access by your catering staff. However, the hidden danger lay in the ductwork that passes through the building to the extraction point. A thorough clean by our specialists would be the advised way to adhere to health & safety regulations.

Our Industrial and Commercial cleaning services include:

We have trained BESA trained technicians who complete the work and ensure they are following health and safety guidelines. We also follow carefully trained techniques to ensure that we are cleaning the stubborn grease within the ducts to ensure minimal mess is caused within the environment. We can guarantee that our friendly and approachable staff will communicate throughout whole process from planning the deep clean to suit your business needs to also completing the clean to which suits your needs.

Why Deep Clean?

Assists compliance with Fire & Food Safety Legislation and Fire Safety Legislation;

- Food Safety Act and Food Safety (General Food Hygiene) Regulations 1995 (Due Diligence)
- Regulatory Reform Fire Safety Order 2005
- Management of Health and Safety at Work Regulations 1999
- EC/852 - Regulations on 'Hygiene of Foodstuffs'
- Working at Height 2005
- COSHH Regulations 2002
- Working at Height 2005
- COSHH Regulations 2002
- Assists compliance with Buildings Insurance Policies
- Reduces the risk of Food Safety Incidents
- Assists achievement of Environmental Health Standards
- Significantly reduces the potential risk of fire
- Prolongs working life and operating efficiency of equipment and extractor motor system
- Reduces the risk of contamination by minimising the risk of pest infestation & helping to ensure that the highest level of hygiene is maintained
- Contributes to the maintenance of a pleasant and safe working environment
- Peace of mind

Equipment We Use:

Our specialist and state of the art technology has multifunctional equipment design which will allow us to clean grease build up on fume hoods, extractor fans and ducts. All the technology needed is integrated into the system, from rotary brushing using a flexible shaft (mechanical action) as well as the alkaline foam generation system to remove grease deposits (chemical action) using the liquid injection nozzle located in the brush heads. The Ease of use, versatility, speed and efficiency is what this equipment can bring to the job to minimize disruption to business

We also want to ensure you that once the grease has been tackled that we use appropriate coverings and drainage systems for the grease to be released into from the ducting vents without leaving any grease behind on the floor ,walls and surfaces.
