

A large, stylized fleur-de-lis graphic in a dark gray color, positioned on the left side of the page. It features three main lobes, with the central one being the largest and most prominent. The lines are thick and smooth, giving it a modern, minimalist feel.

HAWKSMOOR CONSTRUCTION

A three-story red brick house with a modern glass extension at the ground level. The house features a prominent gabled roof with a brick chimney on the right. The ground floor has a large glass extension with a staircase leading up to the entrance. The upper floors have arched windows and a dormer window. The house is surrounded by greenery and a paved area in the foreground.

Hawksmoor Construction is a high-end, sustainably conscious company with a collective and collaborative approach. Inspired and driven, we strive to always work with the client's vision front of mind and to deliver beautiful, exquisitely finished projects from end-to-end.

WHO WE ARE

We are a multi-award-winning Construction Company.

At Hawksmoor Construction we specialise in delivering high-end homes in London and the home counties.

We achieve this by utilising our expertise to provide you with a professional and complete building design service, that is focused on quality in every way.

With over 20 years of collective trade and industry experience, Paul Fitzgerald set up Hawksmoor Construction with the explicit aim of creating stunning homes and by doing so, we have become a multi-award-winning company. Intrinsic to this, Paul has an absolute commitment to the quality and the finish of the building project as much as the architects and designers and most importantly, the clients themselves.

We pride ourselves on every member of our team having meticulous attention to detail and an exceptionally high standard of workmanship. This means that you can rest assured knowing that from the initial design stage, through to the final construction stage, we will not only meet your requirements, but we will exceed them.

What's more, we approach every single project with a clear dedication to making the project process as easy as possible for you. We believe that honesty and an ongoing, fully informative dialogue is the key to unlocking the full potential of your project. This has proven successful time and time again and resulted in many referrals, of which we are very proud.

WHAT WE DO

'We are a Chartered Building Company.

NEW BUILD

We offer design-and-build services for new and bespoke properties.

We have a hard-earned reputation for the quality and inventiveness of our start-to-finish service and we cover every aspect of constructing a new home from the foundations up.

We work with expert architects who specialise in maximising the design to ensure you get the beautiful home you have always dreamt about.

EXTENSIONS

Building extensions allow you to realise the full potential of your property, be it extending downstairs, upstairs or both. Whether it be a side return, wraparound, off the back or a double/triple story extension, our expertise is second to none in delivering you an amazing new home.

We are able to help you maximise the surrounding land to your existing property in order to increase the overall footprint of your home. We do this in a way that respects your property's characteristics and is in-keeping with your desired style.

REFURBISHMENTS

Refurbishing your home is a simple way of breathing new life into it. Whether it is a fully stripped back to brick refurbishment (involving re-wiring, replumbing, re-plastering, a new kitchen, bathrooms or joinery) or a simple freshen up of the existing space, our attention to detail will ensure your home is finished to the highest of standards.

It is very important that any internal alterations are carried out in accordance to and with the current Building Regulations. With our knowledge and experience we are more than happy to deal with the local authority on your behalf to make the project as hassle free as possible for you.

LOFT CONVERSIONS

Converting an underused loft remains one of the simplest, most effective ways to create new living space within an existing property.

We have two decades of experience in constructing dormer, hip-to-gable and mansard loft conversions in line with any specification.

You can normally fit between one to three bedrooms and one to two bathrooms into an unused loft space, and this is a great and cost-effective way of adding value to your property.

BASEMENTS

Basement construction is a brilliant way to enhance and expand your home. It can also transform the space under the original footprint of the property creating a fabulous, functional new space. We have vast experience delivering the most complex of basement dig outs with a holistic service from design, installation and waterproofing right through to the finishing touches.

We love to offer creative ideas and tailor-made solutions to create the space that our clients desire and ensure correct levels of protection are put in place.

INTERIOR DESIGN

Basement construction is a brilliant way to enhance and expand your home. It can also transform the space under the original footprint of the property creating a fabulous, functional new space. We have vast experience delivering the most complex of basement dig outs with a holistic service from design, installation and waterproofing right through to the finishing touches.

DESIGN & BUILD

Working with us on a design & build basis allows you to replace the traditional method of hiring separate architects and builders.

From concept to completion, we are committed and capable of providing our clients a full design and build service of the highest standard at all times. We can take care of all aspects throughout your project from the initial consultation, through to the survey and design, onto the planning permission and building regulations approval.

We work with some of the best architects in London and we can ensure you that your home is thoughtfully designed from the start.

REVIEWS

L Sanjuan (Architect):

I am an Architect and Director at SODA studio and recently worked with Hawksmoor on the full refurbishment of a 300sqm residential property in London.

Paul was my main point of contact there and I found him honest, reliable, responsive and always professional. He has a great eye for detail and never compromises on quality. I always felt that we were working collaboratively towards a common goal. The project is now complete, and the quality is exceptional. I couldn't be happier with the result.

I also worked closely with the team on site. They were great to deal with and showed a high level of skill. The site was always tidy and run professionally.

Amelia Granville (Client):

Hawksmoor Construction are simply THE BEST. They are professional and the quality of their work is exceptional. They are also very nice to work with and go out of their way to make things work for the client. I actually missed them when the job was finished. I don't know what else to say except I wouldn't hesitate to recommend them.

Nick Varey (Architect):

"From the outset I found Paul to be a great communicator, and his approach to the project was professional. The quality of the work on site is very high, with great attention paid to ensuring the vision of the architect and client is delivered as planned. I look forward to working with Paul and his very skilled team on future projects and would not hesitate to recommend Hawksmoor Construction to others."

Pareen d'Avoine (Architect):

"My architectural practice, Russian For Fish, has worked with Hawksmoor in both a professional capacity & as a client. They are a dream to work with & we hope this is the beginning of a long working relationship."

"We cannot recommend them highly enough. Our only hope is they don't get so busy that they don't have time for us!"

Alex Rider (Architect):

"Rider Stirland Architects have worked with Paul and his fantastic team at Hawksmoor Construction on a number of complex residential projects. Their professional approach, very hard work and fantastic communication allows Hawksmoor to deliver projects to a very high standard and quality. On all our projects with Hawksmoor they have been a pleasure to work with and we always look forward to the next successful project working together."

Susan Rumbold (Director at Tessuto Interiors):

"We have worked with Hawksmoor on 3 projects in the past year. With Hawksmoor, we are assured that all aspects of the job will run smoothly. The finishing quality is of the highest order and the work is completed on time if not earlier than projected. Paul and his team are a dream and they form a great relationship with the client quickly and this only helps for the project to run smoothly. We highly recommend Hawksmoor Construction."

PRESS AND AWARDS

**Regional and
devolved nation
2021 Winner**

**London
2023 Winner**

Dezeen August 2023

"The overhaul of the 19th-century building started as a simple ground-floor renovation to replace the kitchen and improve the connection between the house and its garden.

However, exploratory works showed the four-storey property to be in bad structural condition, which demanded major improvement works but also gave the owners an opportunity to reimagine their period home."

Buildit November 2022

The impressive Victorian property to North London's Queens Park had previously been refurbished on the upper storeys, but retained a cramped and uninspiring kitchen that wasn't fit for modern family life.'

Buildit September 2021

"Bagging the Federation of Master Builder's (FMB) London Medium Renovation Project award, this breathtaking rear extension and ground floor refurbishment has totally transformed the original, tired 1960s property."

THINK GREEN, THINK HAWKSMOOR

We are proud to plant trees with TreeApp. A leading global tree planting organisation operating sites across the world.

With a dedication to reforest our planet, their work spans across 15+ countries with a specific focus on countries where they're most needed.

TreeApp is committed to supporting projects which show tangible impact for people and the planet, with each of their projects supporting the UN Sustainable Development Goals.

Why Plant Trees ?

Our industry consumes 40% of the world's usage of raw stones, gravel and sand, as well as 25% of the world's virgin wood annually. What does this all mean? In short, construction companies are big contributors to climate change.

The UK Government has set a goal to become a carbon neutral economy by 2050, and we believe it is part of our social responsibility as a company too replenish the earth with the resources we are using - this is the reasoning behind our partnership with TreeApp - we promise to plant a certain number of trees on a monthly basis.

Reducing our carbon footprint

Reducing our environmental impact

Striving to meet the UK's emission reduction target

CONTACT US

If you would like to arrange an initial consultation at your property, please do not hesitate to get in touch. We will happily travel to your home to listen to your ideas and concepts before giving expert advice and guidance. We also offer free no-obligation quotations for all of our projects.
